

Simplify Your HR

Streamline hiring and employee contract management.

EASY HIRING

Growing your team should be exciting and not make you feel stressed and anxious. With Bytecrunch HR, hiring new employees is a breeze with our easy-to-use interface automating payments and benefits.

HR TRACKING AND MANAGEMENT

Centralize your employee HR records online and automatically sync key data across apps on the Bytecrunch platform—from payroll, to time and mobile. Smart approval workflows allow level 1 and level 2 managers to approve employee HR and leave requests that are then updated against the master employee record.

BUSINESS INTELLIGENCE REPORTS & DASHBOARDS

Your HR data should be used in the best way possible to empower your business. With the business intelligence reports and dashboards, you can easily visualize key HR data and gain valuable insights into which processes are working well and where there's room for improvement. You can access our preconfigured standard reports and dashboards or use our in-built designer to create custom reports and charts displaying information that is most critical to your business in formats of your choice.

DESIGNED TO BE EASY TO USE

Bytecrunch has a modern and user-friendly interface that is easy to use and understand. We've continuously improved and fine-tuned our design with years of feedback from HR and payroll users from a multitude of industries. The clean interface has been inspired by Microsoft Outlook with tabs allowing you to easily switch between different functions. Our grids allow you to filter data with simple or complex conditions, to add or delete columns and to personalize views by saving layouts with information that you want to see.

INNOVATION

At Bytecrunch we constantly innovate to bring you the latest features to improve your HR software and processes and ultimately simplify your life. With Bytecrunch you're not just buying a world class product but you're also engaging a professional and well qualified team dedicated to constantly adding value to your business every day of every year.
